Bachelor of Biomolecular Science (Honours) (International students)

Program code
1540

Available at
Nathan Campus

Duration
2 years full-time accelerated
4 years full-time equivalent

Credit points
320

Indicative fee
$39,500.00* per year (more)
* 2024 indicative annual fee

(Additional requirements)

CRICOS code
082673B

Commencing in
Trimester 1 and Trimester 2

Apply Now

Important Notes

This program is only available to International students articulating from the Nanjing University of Chinese Medicine (NJUCM), China.

About this program

Today's discoveries in the biomolecular sciences lead to tomorrow's applications in fields ranging from medicine and healthcare to food, agriculture, environmental protection and the biotechnology industries.

Biomolecular science is the most rapidly developing area in science at the crossroads of the biological, chemical, physical and computational sciences that are driving the current extraordinary advances across biotechnology and medicine. It encompasses chemistry, biochemistry, molecular biology, the new genetics, genetic engineering, genomics and proteomics, structural and systems biology and bioinformatics.

This advanced program is designed to train a new generation of biomolecular scientists to meet industry requirements for professional, workplace ready, research-ready graduates with high-level expertise and skill.

The program gives you a unique opportunity to be immersed in cutting-edge research during your undergraduate studies, with the flexibility to undertake a fourth year level research track, or to exit after successful completion of third year level with a Bachelor of Biomolecular Science.

Code	Program title	Campus	Intake
1540	**Bachelor of Biomolecular Science (Honours) (this program)**	**Nathan**	**Trimester 1 and Trimester 2**
1350	Bachelor of Biomolecular Science	Nathan	Exit point only

My attendance during the program

Attendance information

The Bachelor of Biomolecular Science (Honours) is available full-time on-campus at Nathan. The program includes some Trimester 3 core courses. Trimester 3 courses are offered in intensive mode.

If you are an International student on a student visa, you must ensure that you enrol in a way that will allow you to complete your enrolment within the expected program duration as stated on your Confirmation of Enrolment (CoE).

My career opportunities

My career opportunities

As a biomolecular scientist, you could find a wide range of professional and research career opportunities in health and medical research institutes, public health programs, medical diagnostics, therapeutics, pharmaceuticals and research and development roles in a wide range of research institutes and government agencies, government policy development, regulatory monitoring, and science education.

Professional recognition

Professional recognition

The Royal Australian Chemical Institute (RACI) recognises graduates of this award.

What are the fees?

International students

An International student is one who is not:

- an Australian or New Zealand citizen or
- a Pacific Engagement visa holder or
- a person who has Australian permanent resident status.

Indicative annual tuition fee

The indicative annual tuition fee is calculated based on a standard full-time study load which is usually 80 credit points (two full-time trimesters).

The indicative annual tuition fee is based on current conditions and available data and should only be used as a guide. These fees are reviewed annually and are subject to change.

Tuition fees

- An International student pays tuition fees.
- Students are liable for tuition fees for the courses they are enrolled in as at the census date.
- The tuition fee for students who commence their program prior to 2014 is charged according to the approved program fee for the trimester in which the student commenced the program.
- The tuition fee for students who commence their program from 2014 onwards is charged according to the approved program fee for the trimester in which the student is enrolled.

Program fees for the Bachelor of Biomolecular Science (Honours) (1540)

Fees for this program can be found on the Programs and Courses website in the "Overview and fees" section. Select your commencing year to view your fees.

Changing programs

If an International student changes to a different program they will be subject to the approved program fee for the trimester in which they are enrolled.

Permanent resident status

If an **undergraduate student** obtains permanent resident status in Australia after commencing study in a program, and the student can provide evidence of permanent resident status prior to the census date (of the trimester in which they are enrolled), the student will be provided with a domestic fee-paying place.

The student may then apply for a Commonwealth supported place at the next admission period provided that the student satisfies the conditions for transfer from a domestic fee-paying place to a Commonwealth supported place as set out in the Undergraduate Programs Admission Policy.

If a **postgraduate student** obtains permanent resident status in Australia after commencing study in a program, and the student can provide evidence of permanent resident status prior to the census date (of the trimester in which they are enrolled), the student will automatically be considered for a Commonwealth supported place (subject to availability) or a domestic fee-paying place as applicable for the program.

If a **research student** obtains permanent resident status in Australia after commencing study in a program, and the student can provide evidence of permanent resident status prior to the census date (of the trimester in which they are enrolled), the student will automatically be considered for a Commonwealth Government Research Training Program (RTP) Fee Offset or a domestic fee-paying place as applicable for the program.
