

Bachelor of Intelligent Digital Technologies (International students)

Program code

1596

Commencing in

For Continuing Students Only

Available at

Gold Coast Campus, Nathan Campus

Duration

3 years full-time

Credit points

240

About this program

This new degree brings together technical and practical skills in the fields of intelligent digital technologies. You will learn the fundamentals of Information and Communication Technology (ICT) problem solving and high level programming skills, for application in cutting edge fields such as the Internet of Things (IoTs), robotics, app and web development, big data analysis, and virtual reality (VR) and augmented reality (AR) applications.

In your first year you will learn about trends in emerging technologies, coding and human computer interaction. Choose between two majors, IoTs and Robotics or Programming for Visualisation and Entertainment, or undertake both majors. If you choose a single major you will have the flexibility to undertake electives of your choice. In your final year of studies, you will bring together your skills and knowledge to form Intelligent Digital Technologies for industry through a work integrated learning course.

My attendance during the program

Attendance information

The Bachelor of Intelligent Digital Technologies is offered full-time. Courses are offered in blended learning mode which range from fully online to, where access to specialised hardware is required, on-campus only. Some courses are offered in intensive mode over Trimester 3.

If you are an International student on a student visa, you must ensure that you enrol in a way that will allow you to complete your enrolment within the expected program duration as stated on your Confirmation of Enrolment (CoE).

Work-integrated learning

Students must complete a 20 credit point Work Integrated Learning (Work Integrated Learning (WIL)) course in their final year. Work Integrated Learning (WIL) has been designed to integrate students into the workplace through the completion of an industry-based work, which is designed to benefit both the student and the industry partner. Work Integrated Learning (WIL) can be taken as either a Placement or team-based project. With Placement, students are placed with an industry partner where students attend their placement 2 days a week to produce the deliverable(s) for that organisation. With team project, students are assigned into a team to work on a project from an industry partner. With either choice, students use their placement or team project as a vehicle to apply what they have learned in their program and demonstrate independent and life-long learning on the job.

The inclusion of work-integrated learning in this program demonstrates Griffith's commitment to preparing its graduates for success in their working life.

My career opportunities

My career opportunities

The Bachelor of Intelligent Digital Technologies program prepares students for careers as designers and developers for various cutting-edge technologies including Virtual Reality (VR) and Augmented Reality (AR), 3D visualisation, Internet of Things (IoTs), Robotics, Unmanned Aerial Vehicles (UAVs), Artificial Intelligence and Big Data.

Program accreditation

Program accreditation

Accreditation of the Bachelor of Intelligent Digital Technologies will be sought with the Australian Computer Society (ACS).

What are the fees?

International students

An International student is one who is not:

- an Australian or New Zealand citizen or
- a Pacific Engagement visa holder or
- a person who has Australian permanent resident status.

Indicative annual tuition fee

The indicative annual tuition fee is calculated based on a standard full-time study load which is usually 80 credit points (two full-time trimesters).

The indicative annual tuition fee is based on current conditions and available data and should only be used as a guide. These fees are reviewed annually and are subject to change.

Tuition fees

- An International student pays tuition fees.
- Students are liable for tuition fees for the courses they are enrolled in as at the census date.
- The tuition fee for students who commence their program prior to 2014 is charged according to the approved program fee for the trimester in which the student commenced the program.
- The tuition fee for students who commence their program from 2014 onwards is charged according to the approved program fee for the trimester in which the student is enrolled.

Program fees for the Bachelor of Intelligent Digital Technologies (1596)

Fees for this program can be found on the Programs and Courses website in the "Overview and fees" section. Select your commencing year to view your fees.

Changing programs

If an International student changes to a different program they will be subject to the approved program fee for the trimester in which they are enrolled.

Permanent resident status

If an **undergraduate student** obtains permanent resident status in Australia after commencing study in a program, and the student can provide evidence of permanent resident status prior to the census date (of the trimester in which they are enrolled), the student will be provided with a domestic fee-paying place.

The student may then apply for a Commonwealth supported place at the next admission period provided that the student satisfies the conditions for transfer from a domestic fee-paying place to a Commonwealth supported place as set out in the [Undergraduate Programs Admission Policy](#).

If a **postgraduate student** obtains permanent resident status in Australia after commencing study in a program, and the student can provide evidence of permanent resident status prior to the census date (of the trimester in which they are enrolled), the student will automatically be considered for a Commonwealth supported place (subject to availability) or a domestic fee-paying place as applicable for the program.

If a **research student** obtains permanent resident status in Australia after commencing study in a program, and the student can provide evidence of permanent resident status prior to the census date (of the trimester in which they are enrolled), the student will automatically be considered for a Commonwealth Government Research Training Program (RTP) Fee Offset or a domestic fee-paying place as applicable for the program.
