

Bachelor of Software Engineering (Honours) (International students)

Program code	Entry requirements	Prerequisites
1656	6.5	NIL
Available at Gold Coast Campus, Nathan Campus	IELTS (Academic) (more)	Assumed knowledge Any General or Applied English subject (Units 3 and 4, C)
Duration 4 years full-time	CRICOS code 106761M	Mathematical Methods (Units 3 and 4, C)
Credit points 320	Commencing in Trimester 1 and Trimester 2	Apply Now
Indicative fee \$42,000.00* per year (more) * 2024 indicative annual fee		

About this program

From biotechnology to sports to submarines, if you want a hand in designing and implementing the software systems our society depends on, Griffith's Bachelor of Software Engineering (Honours) is the ideal path for you.

You'll learn in state-of-the-art facilities from passionate, experienced teachers. You'll be engineering from day one, with a solid foundation in mathematics, computer systems, engineering principles and information systems. In your second year, you'll explore computer algorithms, object-oriented programming, business analysis, computer network essentials and more.

Along the way, you'll gain vital skills and knowledge in fields such as mobile app development, network security and project management. You'll also address the key social and professional issues facing software engineers as the 21st century - and humanity's complex relationship with devices - continues to develop.

Industry and expert connections

At Griffith, we prioritise industry engagement in everything we teach. Our degrees also have a practical foundation, so you know what you're learning will be relevant to your career long after you graduate. You'll gain valuable skills in teamwork, project management and quality management as you complete project work developing software for real clients.

Your learning experience will involve practising engineers directly through your laboratory and tutorial sessions. Additionally, your teachers will draw on their professional experience in choosing lab activities, projects and/or case studies, and problems. You'll also be exposed to the realities of current industry practice through a range of field trip opportunities.

In your final year, you'll spend more than half your time engaging in work-integrated learning (WIL). As part of the final year's significant focus on WIL experiences, you'll team up with your peers to take on a group project in a practical environment. You'll also conduct a major engineering research project as part of our capstone Industry Affiliates Program. The course will give you the opportunity to apply the skills and knowledge gained during your degree to an industry-led project. You'll even have the chance to enlist one of our industry partners as your supervisor.

Global Mobility

Students may be eligible to do an international field trip, organised by the academic staff. This may count towards a component of the degree, depending on the structure.

My attendance during the program

Attendance information

The Bachelor of Software Engineering (Honours) program is offered full-time at the Gold Coast and Nathan campuses and delivery is via internal mode (on-campus) with a Trimester 1 and 2 intake only. Students who commence in trimester 2 will have core trimester 3 courses in their first year.

If you are an International student on a student visa, you must ensure that you enrol in a way that will allow you to complete your enrolment within the expected program duration as stated on your Confirmation of Enrolment (CoE).

Work-integrated learning

An integrated program of exposure to industry practice is built into the program. Practising engineers will be directly involved in the learning and teaching process, particularly through involvement with laboratory and tutorial sessions. Staff will draw upon their industry/professional experience in choosing their laboratory activities, their projects and/or case studies and problems. Field trips will enhance awareness of the current industry/professional practice.

The Software Engineering program has two Work Integrated Learning courses in the final year comprising of over half of the final year. The first course is a 20 credit point course dedicated to performing Software Engineering as part of a group in a work environment. The pinnacle of our work-integrated learning experience is the 40 credit point Industry Affiliates program (IAP) wherein students will undertake a trimester-long capstone project. Students are encouraged to conduct their IAP-Thesis project in industry and our WiL office will assist in finding placements for students who might have been unable to find their own placement. A co requisite of this program is the completion of a minimum of 12 weeks (60 days) of approved experience in an engineering practice environment (or a satisfactory alternative).

My career opportunities

My career opportunities

Graduate outcomes

When you graduate from this degree, you'll be prepared for work in a growing, socially important field. With dual accreditation from Engineers Australia and the Australian Computer Society, you'll meet all the relevant benchmarks you need to launch your career anywhere in the country and around the world.

Through this degree, you may find work opportunities in government and the private sector, in a variety of roles such as software engineer, architect, developer or tester, project manager, computational scientist, database designer, and much more.

Program accreditation

Program accreditation

The Bachelor of Software Engineering (Honours) is accredited by the Australian Computer Society.

The Seoul award recognises the substantial equivalence of accreditation systems and accredited programs across international boundaries of its signatories. Please see the Australian Computer Society website for the most recent list of accredited programs.

Accreditation is also conditionally approved by Engineers Australia.

In Australia, professional accreditation of entry to practice engineering programs is the responsibility of Engineers Australia and is normally carried out on a five-yearly cycle. Griffith University underwent this review in 2020.

Accreditation ensures academic institutions consistently meet national and international benchmarks and engineering graduates of an accredited program are assured membership with Engineers Australia at the relevant career grade and enjoy reciprocal privileges by equivalent professional bodies overseas.

Countries such as the USA, United Kingdom, Hong Kong (SAR), New Zealand, Canada, South Africa and others that are co-signatories to international agreements on joint recognition offer international recognition.

The Washington Accord, the Sydney Accord and the Dublin Accord recognise the substantial equivalence of accreditation systems and accredited programs across international boundaries at the Professional Engineer, Engineering Technologist and Engineering Associate levels respectively. Please refer to the [International Engineering Alliance \(IEA\)](#) website for more details.

Please see the [Engineers Australia](#) website for the most recent list of accredited programs.

Pathways to further study

Pathways to further study

The Bachelor of Software Engineering (Honours) program provides a pathway to research higher degrees with direct entry into doctoral programs for students who graduate with First Class Honours. It also provides the opportunity for gifted graduates to apply for scholarships and awards.

What are the fees?

International students

An International student is one who is not:

- an Australian or New Zealand citizen or
- a Pacific Engagement visa holder or

- a person who has Australian permanent resident status.

Indicative annual tuition fee

The indicative annual tuition fee is calculated based on a standard full-time study load which is usually 80 credit points (two full-time trimesters).

The indicative annual tuition fee is based on current conditions and available data and should only be used as a guide. These fees are reviewed annually and are subject to change.

Tuition fees

- An International student pays tuition fees.
- Students are liable for tuition fees for the courses they are enrolled in as at the census date.
- The tuition fee for students who commence their program prior to 2014 is charged according to the approved program fee for the trimester in which the student commenced the program.
- The tuition fee for students who commence their program from 2014 onwards is charged according to the approved program fee for the trimester in which the student is enrolled.

Program fees for the Bachelor of Software Engineering (Honours) (1656)

Fees for this program can be found on the Programs and Courses website in the "Overview and fees" section. Select your commencing year to view your fees.

Changing programs

If an International student changes to a different program they will be subject to the approved program fee for the trimester in which they are enrolled.

Permanent resident status

If an **undergraduate student** obtains permanent resident status in Australia after commencing study in a program, and the student can provide evidence of permanent resident status prior to the census date (of the trimester in which they are enrolled), the student will be provided with a domestic fee-paying place.

The student may then apply for a Commonwealth supported place at the next admission period provided that the student satisfies the conditions for transfer from a domestic fee-paying place to a Commonwealth supported place as set out in the [Fees and Charges Procedure](#).

If a **postgraduate student** obtains permanent resident status in Australia after commencing study in a program, and the student can provide evidence of permanent resident status prior to the census date (of the trimester in which they are enrolled), the student will automatically be considered for a Commonwealth supported place (subject to availability) or a domestic fee-paying place as applicable for the program.

If a **research student** obtains permanent resident status in Australia after commencing study in a program, and the student can provide evidence of permanent resident status prior to the census date (of the trimester in which they are enrolled), the student will automatically be considered for a Commonwealth Government Research Training Program (RTP) Fee Offset or a domestic fee-paying place as applicable for the program.
