

Bachelor of Advanced Engineering (Honours) (Domestic students)

Program code

1690

Commencing in

Trimester 1 and Trimester 2

Available at

Gold Coast Campus, Nathan Campus

Duration

5 years full-time

10 years part-time

Credit points

400

Important Notes

This program is pending final approval and is scheduled to commence in trimester 1, 2025.

About this program

This degree is designed for high-achieving students. Undertake advanced engineering study to boost your future career with guaranteed opportunities for paid internships, industry and research experience. Students are expected to maintain a credit average GPA to remain in this degree. In your first year, you'll develop a strong foundation in basic science and engineering principles. In your second year, you'll choose your preferred major so you can focus on your passion. In your final year you'll put your skills to work on a project with one of our industry partners here or overseas, as part of our trimester-long Industry Affiliates Program.

Created in close collaboration with engineering professionals, this degree is designed so the lessons you learn inside and outside the classroom have real, immediate value for your career. Throughout your studies you'll be able to apply your knowledge in a range of practical settings including mentorships and work placements. From your first year you'll have the opportunity to engage in two to three weeks of paid, full-time industry experience, increasing to four to five weeks in second year, and up to twelve weeks in your third year as part of your capstone course.

My attendance during the program

Attendance information

Student Income Support

To be classed as a full-time student, you are required to enrol in a minimum number of credit points each standard study period. The minimum credit points for full-time enrolment in this program is 30 credit points.

Trimester 1 and Trimester 2 are deemed standard study periods. As Trimester 3 is a non-standard study period, continuing students moving from one year to the next will not be required to study during this trimester to be eligible for student income support.

Domestic students who commence in Trimester 3 may be eligible for student income support from the onset of study provided they are enrolled full-time in this study period.

Please refer to the [Australian Government website](#) for more details.

My career opportunities

My career opportunities

Get a head start in your career by partnering with top engineering companies through your degree's industry mentoring and networking opportunities. You'll also gain transferable skills that can be used across a variety of industries. Your core logical, analytical and critical thinking skills will be an asset in any industry, and through your chosen specialisation, you'll have the ability to develop robust solutions to complex problems.

Professional recognition

Professional recognition

Professional accreditation for the Bachelor of Advanced Engineering (Honours) will be sought from Engineers Australia.
