Important Notes

This program is scheduled to commence in Trimester 1, 2025.

About this program

This double degree will equip you with modern business and cyber security skillsets. By combining advanced cyber security techniques with a comprehensive understanding of global business dynamics and core IT principles, graduates will be prepared to implement robust security solutions while navigating the complexities of modern business environments. Emphasis is placed on fostering adaptivity, sustainability, problem-solving and creativity, enabling graduates to thrive in diverse industries and sectors. Graduates will have the required knowledge to pursue a career managing a cyber security firm, or as a cyber security analyst at any number of modern businesses.

My attendance during the program

Attendance information

Student Income Support

To be classed as a full-time student, you are required to enrol in a minimum number of credit points each standard study period. The minimum credit points for full-time enrolment in this program is 30 credit points.

Trimester 1 and Trimester 2 are deemed standard study periods. As Trimester 3 is a non-standard study period, continuing students moving from one year to the next will not be required to study during this trimester to be eligible for student income support.

Domestic students who commence in Trimester 3 may be eligible for student income support from the onset of study provided they are enrolled full-time in this study period.

Please refer to the [Australian Government website](#) for more details.

Managing Study Interruptions

Leave of Absence

Taking a leave of absence from this program is permitted, subject to conditions outlined in the Enrolment Procedure

My career opportunities

My career opportunities

You will be prepared for potential career opportunities in a variety of industries spanning public and private sectors, such as banking and finance, information technology, public administration and safety, law, education and training, just to name a few. Your career outcomes might include cyber security manager, cyber security analyst/architect, security consultant, security and compliance auditor, business analyst, training and development specialist, compliance officer, investigator, data analyst, forensic computer analyst, intelligence analyst, computer network specialist or risk manager. You could also pursue a career as

an owner/operator or business manager of a cyber security consulting firm.

Program accreditation

Program accreditation

Accreditation for the Bachelor of Cyber Security will be sought with the Australian Computer Society.
