Trimester 1 and Trimester 2

**Available at**

Nathan Campus

**Duration**

5 years full-time

8 years part-time

**Credit points**

400

**Indicative fee**[Find out more](#)

### About this program

Studying law and biomedical science offers a unique skillset, integrating scientific reasoning with legal acumen. You will be prepared to tackle ethical, regulatory, and policy challenges shaping modern healthcare and biotechnology.

Within biomedical science, students explore the fundamental principles of biomedical and clinical sciences, including genetics, biochemistry, cell biology, anatomy, physiology, immunology, microbiology, infectious disease, pharmacology and neuroscience.

Simultaneously, studying law in this context involves navigating the intricate legal landscape that governs biomedical research, healthcare delivery, and biotechnological innovations. In addition to foundational law study, you will have the opportunity to develop your understanding in healthcare law, bioethics, intellectual property rights, and regulatory frameworks.

You will learn to critically evaluate legal precedents and policies that influence medical fields, as well as the analytical skills to assess ethics, formulate informed policies, and advocate for justice in healthcare settings.

Opportunities to boost your career development and employability are integrated throughout the degrees, and you'll learn in hands-on laboratory environments, as well as on real client case studies, internships, gaining practical experience and building a professional network before you graduate.

### My attendance during the program

**Attendance information****Student Income Support**

To be classed as a full-time student, you are required to enrol in a minimum number of credit points each standard study period. The minimum credit points for full-time enrolment in this program is 30 credit points.

Trimester 1 and Trimester 2 are deemed standard study periods. As Trimester 3 is a non-standard study period, continuing students moving from one year to the next will not be required to study during this trimester to be eligible for student income support.

Domestic students who commence in Trimester 3 may be eligible for student income support from the onset of study provided they are enrolled full-time in this study period.

Please refer to the [Australian Government website](#) for more details.

This program is offered full-time and part-time at the Nathan Campus.

### My career opportunities

**My career opportunities**
