About this program

Help stop the spread of disease.

This specialist program prepares you for advanced practice in infection prevention and control by addressing local, national, and international trends in the communicable diseases and infection. It's the longest running tertiary infection prevention and control education program across Australasia. It combines technical health knowledge with a foundation in advanced research and a critical analysis on how leadership and management skills can be applied to create transformative change in healthcare.

You'll gain a foundation in the microbial basis of infection and the sciences of disease, including the mechanisms involved in the breakdown of homeostasis in the human body and their manifestation as a communicable disease. It also includes the epidemiology of classic and contemporary infectious diseases in national and international populations, including surveillance systems for control and prevention.

Industry and expert connections

Research plays a critical role in the design of evidence-based infection prevention and control measures in health care settings, and this program will provide you with the foundational skills you'll need to interpret research results and to design your own studies that abide by legal and ethical principles. You'll be capable of synthesising findings of research reports as they are applicable to professional practice.

Throughout this program you'll learn alongside health graduates and experienced health professionals in interactive learning environments including online seminars and forums. This is a great opportunity to learn from your peers and develop important professional connections. This collaborative learning approach is led by our experienced academics, who are recognized leaders in their fields.

Graduate outcomes

With a technical understanding of infectious disease and research analysis and design, coupled with a thorough understanding of theory and practice in leadership for healthcare, you will be capable of leveraging your personal influence to foster transformative change within your organization, with those changes guided by proven management strategies. You will be prepared to lead the management and coordination of infection control programs in a range of settings, with a particular emphasis on prevention.

Flexibility

Study anytime, anywhere - This degree is available online through our Digital campus, giving you more room to fit university with your work and social life.

Pursue further study

The courses in this graduate certificate may be credited towards a related graduate diploma or masters degree. Griffith's innovative [Credit Precedent Database](#) allows you to find out what credit decisions have been made in the past, which will give you an idea of what you can expect.

Code	Program title	Campus	Intake
5600	Master of Infection Prevention and Control	Online	Trimester 1, Trimester 2 and Trimester 3
3293	Graduate Certificate in Infection Prevention and Control (this program)	Online	Trimester 1, Trimester 2 and Trimester 3

Pathways to further study

Pathways to further study

Graduates from the Graduate Certificate in Infection Prevention and Control may apply for entry to the [Master of Infection Prevention and Control \(5600\)](#).

What are the fees?

Commonwealth supported students

- The indicative fee represents the expected average fee for an annual full-time study load (80 credit points). This is based on average study patterns across courses and the Australian Government's broad discipline areas (student contribution bands). A student's actual annual fee may vary in accordance with his or her choice of majors and

electives. The Australian Government sets student contribution amounts on an annual basis.

Fee-paying postgraduate (domestic) students

Indicative annual tuition fee

The indicative annual tuition fee is calculated based on a standard full-time study load which is usually 80 credit points.

The indicative annual tuition fee is based on current conditions and available data and should only be used as a guide. These fees are reviewed annually and are subject to change.

Tuition fees

- A fee-paying postgraduate student pays tuition fees.
- Students are liable for tuition fees for the courses they are enrolled in as at the census date.
- The tuition fee for students who commence their program prior to 2014 is charged according to the approved program fee for the trimester in which the student commenced the program.
- The tuition fee for students who commence their program from 2014 onwards is charged according to the approved program fee for the trimester in which the student is enrolled.

Additional fee information

This postgraduate program has Commonwealth Supported Places. If you are eligible, the Australian Government will contribute to the cost of this program but you will also be required to make a contribution. Quotas are applied for admission to the Commonwealth Supported Places. Where demand exceeds the number of available places and all places have been filled for the current admission period, applicants who meet minimum program entry requirements may be eligible for a Fee-Paying Postgraduate place if such places are available. Please note that deferrals are not permitted for programs with Commonwealth Supported Places.
