

Graduate Diploma of Health Research (Domestic students)

Program code 4161	Admission requirements Related Bachelor degree (5.0 GPA) or higher Related Masters degree or higher (more)	Commencing in Trimester 1 and Trimester 2
Available at Gold Coast Campus, Logan Campus, Nathan Campus, Online, South Bank Campus		Next start date Trimester 1, 2025 (more)
Duration 1 year full-time		Applications close Monday, 10 February 2025 Apply Now
Credit points 80		
Indicative fee \$12,500.00* per year (more) * 2024 indicative annual CSP fee		

About this program

This degree provides an alternative route for entry into a Doctor of Philosophy (PhD) or a Master of Philosophy (MPhil) if you do not meet the entry requirements for direct admission.

When you complete this degree, you will be granted admission to an MPhil or PhD, providing you have fulfilled the entry requirements detailed in the [Higher Degree by Research Policy](#) and have completed the confirmation procedure. Your final grade will determine whether you are eligible for the PhD or MPhil.

You will undertake advanced study and supervised research work in the health discipline, defined by your undergraduate degree. In the coursework component, you will critically evaluate research and develop your knowledge and understanding of statistical analysis techniques as applied to health research. You will also develop an awareness of research proposal design and background. The multidisciplinary context of this degree will be invaluable to you if you are seeking to understand complex problems in health.

Code	Program title	Campus	Intake
4161	Graduate Diploma of Health Research (this program)	Gold Coast, Logan, Nathan, Online, South Bank	Trimester 1 and Trimester 2
3276	Graduate Certificate in Health Research	Gold Coast, Logan, Nathan, Online, South Bank	Exit point only

My attendance during the program

Attendance information

The Graduate Diploma of Health Research is offered on campus full-time or part-time. The program is also available in online mode for students who meet specific criteria as outlined below. Students who wish to complete the program part-time will be required to consult with the School Advisor to determine the appropriate program structure.

Students enrolling in the Graduate Diploma of Health Research are required to complete 40 credit points of coursework and a 40 credit point dissertation (research thesis).

On-campus coursework is mainly offered at the Gold Coast campus, with some courses offered at Nathan or Southbank campus - most (but not all) courses are also available in online (off-campus) mode. The dissertation component may require you to attend the Gold Coast, Logan, Nathan or South Bank campuses and/or off campus locations, dependent on your project and/or supervisor location.

Coursework: The coursework will provide critical evaluation of research and presentation, develop the student's knowledge and understanding of statistical analyses techniques as applied to scientific research and develop an awareness of research

proposal design and background.

Dissertation: Students are required to find a suitable supervisor for their research project prior to submitting their application for admission into the program. Students who are unable to locate a suitable supervisor should discuss their proposed research project with their School Advisor.

During enrolment in the dissertation component of this program, it is expected that students will be able to work independently for most of the time. The requirement for on-campus attendance is relatively flexible. However, students will be required to meet regularly with their supervisor and it is recommended that students discuss the on-campus attendance requirements with their supervisor prior to the start of the dissertation.

Where a project requires on-campus laboratory work, students are required to undertake their research at an appropriate laboratory according to the directions of the student's supervisor, School Adviser and/or Program Director. Students are to discuss required workplace health and safety training with their supervisors prior to the commencement of laboratory work. Students who fail to undertake the prescribed workplace health and safety training will not gain entry into laboratories.

Online offering: As completion of a dissertation in distance mode may not be appropriate in some cases, applicants who wish to complete the program online will need to obtain the written approval of the relevant Health Group School, and the proposed supervisor, and submit this documentation with your application. See 'How to apply' section for details. Students studying online will be able to access course materials, participate in learning activities, lodge assessment items and access support services via Learning@Griffith. Access to a reliable computer with internet connection and capability for virtual videoconferencing (such as Skype or similar programs) is essential.

My career opportunities

My career opportunities

You will be able to plan and conduct research in health-related disciplines. You will also be prepared for professional employment in private, not-for-profit and public sector research positions. As a graduate, you will be eligible to apply for admission to higher degree research studies, which can lead to a high level research career.

Pathways to further study

Pathways to further study

Students who have successfully completed the Graduate Diploma of Health Research (and have achieved a Grade Point Average of 5.0 or higher with a grade of 5 in the dissertation component) are eligible to be admitted into the Master of Philosophy (MPhil) program subject to fulfilment of requirements for candidature as specified in the Higher Degree Research Policy and successful completion of the confirmation procedure.

Students who have successfully completed the Graduate Diploma of Health Research (and have achieved a Grade Point Average of 5.5 or higher with a grade of 6 in the dissertation component) are eligible to be admitted into the Doctor of Philosophy (PhD) program subject to fulfilment of requirements for candidature as specified in the Higher Degree Research Policy and successful completion of the confirmation procedure.

What are the fees?

Commonwealth supported students

- The indicative fee represents the expected average fee for an annual full-time study load (80 credit points). This is based on average study patterns across courses and the Australian Government's broad discipline areas (student contribution bands). A student's actual annual fee may vary in accordance with his or her choice of majors and electives. The Australian Government sets student contribution amounts on an annual basis.

Fee-paying postgraduate (domestic) students

Indicative annual tuition fee

The indicative annual tuition fee is calculated based on a standard full-time study load which is usually 80 credit points.

The indicative annual tuition fee is based on current conditions and available data and should only be used as a guide. These fees are reviewed annually and are subject to change.

Tuition fees

- A fee-paying postgraduate student pays tuition fees.
- Students are liable for tuition fees for the courses they are enrolled in as at the census date.
- The tuition fee for students who commence their program prior to 2014 is charged according to the approved program fee for the trimester in which the student commenced the program.
- The tuition fee for students who commence their program from 2014 onwards is charged according to the approved program fee for the trimester in which the student is enrolled.
- [Find out more...](#)

Tuition fees for your degree program

- [Calculating tuition fees](#)

Changing programs

If a postgraduate student changes to a different program they will be subject to the approved program fee for the trimester in which they are enrolled.

Additional fee information

This postgraduate program has **Commonwealth Supported Places**. If you are eligible, the Australian Government will contribute to the cost of this program but you will also be required to make a contribution.

Quotas are applied for admission to the Commonwealth Supported Places. Where demand exceeds the number of available places and all places have been filled for the current admission period, applicants who meet minimum program entry requirements may be eligible for a Fee-Paying Postgraduate place if such places are available. Please note that deferrals are not permitted for programs with Commonwealth Supported Places.
