

Master of Environmental Engineering and Pollution Control (International students)

Program code 5648	Admission requirements Bachelor degree in Engineering or higher Related Bachelor degree or higher and relevant work experience (more)	CRICOS code 083659C
Available at Nathan Campus, Online		Commencing in Trimester 1 and Trimester 2 Apply Now
Duration 1.5 to 2 years full-time 4 years part-time (online only)		
Credit points 160		
Indicative fee \$42,500.00* per year (more) * 2024 indicative annual fee		

About this program

The wants and needs of a rapidly expanding, global population means it has never been more important to shape our environmental future. Environmental engineering is your pathway to protecting the natural environment and its resources by ensuring that we minimise the adverse effect we may have on it. In this program you will develop an understanding of complex environmental problems and issues, and of the challenges facing environmental sustainability. You will learn to design creative engineering solutions and manage key projects associated with environmental protection in the area of solid and hazardous waste management, air quality monitoring and control, water and wastewater treatment, and renewable energy. You will develop the skills to incorporate sustainability concepts into engineering work practices from various discipline backgrounds.

My attendance during the program

Attendance information

The Master of Environmental Engineering and Pollution Control is offered in both online (off-campus) and on-campus modes.

If you are an International student on a student visa, you must ensure that you enrol in a way that will allow you to complete your enrolment within the expected program duration as stated on your Confirmation of Enrolment (CoE).

Work-integrated learning

Students who are currently in employment are strongly encouraged to align their assessment items to the issues and projects related to the workplace. However, there is no compulsory element of Work Integrated Learning (WIL) in the program.

My career opportunities

My career opportunities

You will be prepared for leading environmental engineering practices in the public sector, resource related sectors, infrastructure sectors, and the consulting engineering sector. You will have the skills to work in organisations that deal with solid and hazardous waste, wastewater and air pollution control.

Pathways to further study

Pathways to further study

Students who graduate from the program and pass the Dissertation component will have a pathway to higher degree by research study.

What are the fees?

International students

An International student is one who is not:

- an Australian or New Zealand citizen or
- a Pacific Engagement visa holder or
- a person who has Australian permanent resident status.

Indicative annual tuition fee

The indicative annual tuition fee is calculated based on a standard full-time study load which is usually 80 credit points (two full-time trimesters).

The indicative annual tuition fee is based on current conditions and available data and should only be used as a guide. These fees are reviewed annually and are subject to change.

Tuition fees

- An International student pays tuition fees.
- Students are liable for tuition fees for the courses they are enrolled in as at the census date.
- The tuition fee for students who commence their program prior to 2014 is charged according to the approved program fee for the trimester in which the student commenced the program.
- The tuition fee for students who commence their program from 2014 onwards is charged according to the approved program fee for the trimester in which the student is enrolled.

Program fees for the Master of Environmental Engineering and Pollution Control (5648)

Fees for this program can be found on the Programs and Courses website in the "Overview and fees" section. Select your commencing year to view your fees.

Changing programs

If an International student changes to a different program they will be subject to the approved program fee for the trimester in which they are enrolled.

Permanent resident status

If an **undergraduate student** obtains permanent resident status in Australia after commencing study in a program, and the student can provide evidence of permanent resident status prior to the census date (of the trimester in which they are enrolled), the student will be provided with a domestic fee-paying place.

The student may then apply for a Commonwealth supported place at the next admission period provided that the student satisfies the conditions for transfer from a domestic fee-paying place to a Commonwealth supported place as set out in the [Fees and Charges Procedure](#).

If a **postgraduate student** obtains permanent resident status in Australia after commencing study in a program, and the student can provide evidence of permanent resident status prior to the census date (of the trimester in which they are enrolled), the student will automatically be considered for a Commonwealth supported place (subject to availability) or a domestic fee-paying place as applicable for the program.

If a **research student** obtains permanent resident status in Australia after commencing study in a program, and the student can provide evidence of permanent resident status prior to the census date (of the trimester in which they are enrolled), the student will automatically be considered for a Commonwealth Government Research Training Program (RTP) Fee Offset or a domestic fee-paying place as applicable for the program.
