

Master of Environmental Engineering and Pollution Control (Domestic students)

Program code 5648	Admission requirements Bachelor degree in Engineering or higher Related Bachelor degree or higher and relevant work experience (more)	Commencing in Trimester 1 and Trimester 2 Next start date Trimester 2, 2024 (more) Applications close Monday, 24 June 2024 Apply Now
Available at Nathan Campus, Online		
Duration 1.5 to 2 years full-time 4 years part-time		
Credit points 160		
Indicative fee \$9,500.00* per year (more) * 2024 indicative annual CSP fee		

About this program

The wants and needs of a rapidly expanding, global population means it has never been more important to shape our environmental future. Environmental engineering is your pathway to protecting the natural environment and its resources by ensuring that we minimise the adverse effect we may have on it. In this program you will develop an understanding of complex environmental problems and issues, and of the challenges facing environmental sustainability. You will learn to design creative engineering solutions and manage key projects associated with environmental protection in the area of solid and hazardous waste management, air quality monitoring and control, water and wastewater treatment, and renewable energy. You will develop the skills to incorporate sustainability concepts into engineering work practices from various discipline backgrounds.

My attendance during the program

Attendance information

The Master of Environmental Engineering and Pollution Control is offered in both online (off-campus) and on-campus modes.

Student Income Support

To be classed as a full-time student, you are required to enrol in a minimum number of credit points each standard study period. The minimum credit points for full-time enrolment in this program is 30 credit points.

Trimester 1 and Trimester 2 are deemed standard study periods. As Trimester 3 is a non-standard study period, continuing students moving from one year to the next will not be required to study during this trimester to be eligible for student income support.

Domestic students who commence in Trimester 3 may be eligible for student income support from the onset of study provided they are enrolled full-time in this study period.

Please refer to the [Australian Government website](#) for more details.

Work-integrated learning

Students who are currently in employment are strongly encouraged to align their assessment items to the issues and projects related to the workplace. However, there is no compulsory element of Work Integrated Learning (WIL) in the program.

My career opportunities

My career opportunities

You will be prepared for leading environmental engineering practices in the public sector, resource related sectors, infrastructure sectors, and the consulting engineering sector. You will have the skills to work in organisations that deal with solid and hazardous waste, wastewater and air pollution control.

Pathways to further study

Pathways to further study

Students who graduate from the program and pass the Dissertation component will have a pathway to higher degree by research study.

What are the fees?

Commonwealth supported students

- The indicative fee represents the expected average fee for an annual full-time study load (80 credit points). This is based on average study patterns across courses and the Australian Government's broad discipline areas (student contribution bands). A student's actual annual fee may vary in accordance with his or her choice of majors and electives. The Australian Government sets student contribution amounts on an annual basis.
- [Find out more...](#)

Fee-paying postgraduate (domestic) students

Indicative annual tuition fee

The indicative annual tuition fee is calculated based on a standard full-time study load which is usually 80 credit points.

The indicative annual tuition fee is based on current conditions and available data and should only be used as a guide. These fees are reviewed annually and are subject to change.

Tuition fees

- A fee-paying postgraduate student pays tuition fees.
- Students are liable for tuition fees for the courses they are enrolled in as at the census date.
- The tuition fee for students who commence their program prior to 2014 is charged according to the approved program fee for the trimester in which the student commenced the program.
- The tuition fee for students who commence their program from 2014 onwards is charged according to the approved program fee for the trimester in which the student is enrolled.
- [Find out more...](#)

Tuition fees for your degree program

- [Calculating tuition fees](#)

Changing programs

If a postgraduate student changes to a different program they will be subject to the approved program fee for the trimester in which they are enrolled.

Additional fee information

This postgraduate program has Commonwealth Supported Places. If you are eligible, the Australian Government will contribute to the cost of this program but you will also be required to make a contribution. Quotas are applied for admission to the Commonwealth Supported Places. Where demand exceeds the number of available places and all places have been filled for the current admission period, applicants who meet minimum program entry requirements may be eligible for a Fee-Paying Postgraduate place if such places are available. Please note that deferrals are not permitted for programs with Commonwealth Supported Places.
