2 years full-time		
<b>Credit points</b>		
160		
<b>Indicative fee</b>		
\$36,500.00* per year ( <a href="#">more</a> )		
* 2024 indicative annual fee		

### About this program

The Master of Science is a two-year full-time program providing graduates with the opportunity to undertake advanced study and research. This program is designed to provide you with a thorough training in applied scientific research and methodology and will also prepare you for higher degree studies and professional employment. The program consists of both theoretical and practical coursework, as well as a research dissertation. You will complete advanced coursework prior to completing the research component.

The coursework will provide a critical evaluation of research and presentation, develop your knowledge and understanding of statistical analyses techniques as applied to scientific research, and develop an awareness of research proposal design and background. You will have the opportunity to develop a research proposal including aims, methodology and a literature review.

You will undertake a major research project under the supervision of one of our leading researchers. The program has ten different majors aligned to the discipline strengths of the School, including Applied Mathematics, Archaeological Science, Biomedical Science, Bioscience, Chemistry, Environmental Science, Food Security, Forensic Science, Marine Science and Physics.

The degree will be assessed through coursework, research project performance, thesis and seminar.

#### Industry and expert connections

Griffith has a proud history of leading the way across scientific research. As a student of the Master of Science, you'll have access to leading experts from a range of respected University research centres, including the Australian Research Centre for Human Evolution (ARCHE), the Australian Rivers Institute (ARI), the Centre for Quantum Dynamics (CQD), the Cities Research Institute (CRI), the Environmental Futures Research Institute (EFRI), the Griffith Institute for Drug Discovery (GRIDD), the Institute of Glycomics, the Menzies Health Institute Queensland (MHIQ) and the Queensland Micro and Nanotechnology Centre (QMNC).

### My attendance during the program

#### Attendance information

This program is offered full-time. Coursework is undertaken on-campus and the research project can be undertaken on or off-campus.

### My career opportunities

#### My career opportunities

This program will provide students with advanced cutting-edge theoretical knowledge in their chosen area together with the practical and research skills necessary for employment in the industry and/or research laboratories.

For information about potential employment and career pathways as a Master of Science graduate, please visit the [Research](#)

[Graduate Outcomes website.](#)

## Pathways to further study

### Pathways to further study

Students who successfully complete the Master of Science program at the required level will be eligible to apply for entry to Doctoral Research programs.

## What are the fees?

### Fee-paying research (domestic) students

#### Indicative annual tuition fee

The indicative annual tuition fee is calculated based on a standard full-time study load which is usually 80 credit points (two full-time trimesters).

The indicative annual tuition fee is based on current conditions and available data and should only be used as a guide. These fees are reviewed annually and are subject to change.

#### Tuition fees

- A fee-paying research student pays tuition fees.
- Students are liable for tuition fees for the courses they are enrolled in as at the census date.

### Program fees for the Master of Science (5667)

Fees for this program can be found on the Programs and Courses website in the "Overview and fees" section. Select your commencing year to view your fees.
