Master of Civil Engineering Advanced (Domestic students)

Program code
5692

Available at
Gold Coast Campus

Duration
1.5 to 2 years full-time
4 years part-time

Credit points
160

Indicative fee
$26,500.00* per year (more)
* 2024 indicative annual fee

Admission requirements
Bachelor degree in Civil Engineering or higher

(more)

Commencing in
Trimester 1 and Trimester 2

Next start date
Trimester 2, 2024 (more)

Applications close
Monday, 24 June 2024

About this program

This program provides students with advanced study across the breadth of specialisations in Civil Engineering. It is designed to extend and deepen the knowledge and skills gained from an undergraduate degree in civil engineering. It is ideal for professional civil engineers who aspire to develop their design skills and advance their capabilities to analyse and solve structural problems and manage projects across a wide range of real-world civil engineering applications. The program provides a pathway to a research higher degree.

Code	Program title	Campus	Intake
5642	Master of Civil Engineering	Gold Coast	Trimester 1 and Trimester 2
5692	**Master of Civil Engineering Advanced (this program)**	**Gold Coast**	**Trimester 1 and Trimester 2**
5682	Master of Civil Engineering/Master of Engineering Project Management	Gold Coast	Trimester 1 and Trimester 2
3301	Graduate Certificate in Civil Engineering	Gold Coast	Exit point only

Note: Progression through this program suite is dependent upon satisfying admission requirements.

My attendance during the program

Attendance information

The Master of Civil Engineering Advanced is offered full-time, part-time and on-campus at the Gold Coast.

Student Income Support

To be classed as a full-time student, you are required to enrol in a minimum number of credit points each standard study period. The minimum credit points for full-time enrolment in this program is 30 credit points.

Trimester 1 and Trimester 2 are deemed standard study periods. As Trimester 3 is a non-standard study period, continuing students moving from one year to the next will not be required to study during this trimester to be eligible for student income support.

Domestic students who commence in Trimester 3 may be eligible for student income support from the onset of study provided they are enrolled full-time in this study period.

Please refer to the Australian Government website for more details.

My career opportunities

My career opportunities

Civil engineers have a wide range of career opportunities in the building, construction, infrastructure, and mining industries. They undertake projects (design and/or manage) for a variety of public and private sector clients. More specifically, they provide structural analysis and design services to engineering projects such as roads, bridges, tunnels, water distribution networks and high-rise buildings.

Given the current shortage of civil engineering graduates and experienced civil engineers in Australia, coupled with the huge investment in infrastructure projects nationally and internationally, this degree will enable recently qualified engineering graduates to improve their specialist technical skills.

What are the fees?

Fee-paying postgraduate (domestic) students

Indicative annual tuition fee

The indicative annual tuition fee is calculated based on a standard full-time study load which is usually 80 credit points.

The indicative annual tuition fee is based on current conditions and available data and should only be used as a guide. These fees are reviewed annually and are subject to change.

Tuition fees

- A fee-paying postgraduate student pays tuition fees.
- Students are liable for tuition fees for the courses they are enrolled in as at the census date.
- The tuition fee for students who commence their program prior to 2014 is charged according to the approved program fee for the trimester in which the student commenced the program.
- The tuition fee for students who commence their program from 2014 onwards is charged according to the approved program fee for the trimester in which the student is enrolled.

Program fees for the Master of Civil Engineering Advanced (5692)

Fees for this program can be found on the Programs and Courses website in the "Overview and fees" section. Select your commencing year to view your fees.
